

# Chevaline Dexx

- Flexible Reinforced Roof and Deck Membrane

**Dexx** is a liquid applied, glass fibre mat reinforced membrane for use in sealing old and new flat and near-flat roofs, walk-out decks and patios. The material is a heavy-bodied water-borne acrylic paste ready to use from the container. It is formulated for high adhesion, and water resistance, also toughness combined with flexibility in the cured film. This makes it particularly useful where areas are subject to foot traffic and light vehicular traffic.

**Dexx** is supplied as standard grey and white but custom colours are available to match any colour chart.

- Available in 4L and 15L pails
- Spreading rate of 2-2.5sqm/litre/coat

#### Key Benefits:

- 100% NZ made
- 35 years of proven performance in New Zealand conditions
- Excellent durability & UV resistance
- Easy to apply
- Applicable to a variety of surfaces in both horizontal and vertical situations
- Wide colour range available
- Easy long term maintenance

#### Application (Minimum System):

- Primer specific to substrate
- Dexx Bodycoat
- Glass fibre mat (laid into wet bodycoat)
- Dexx Bodycoat
- Dexx Bodycoat
- Wearcoat/Glazecoat as Topcoat

Glass fibre mat laid into wet bodycoat
